

2285 Extension Kit Model 2000 DISHMASTER

1. Remove the flanged washers from valve body and hose guide
2. Screw the brass extension rings $\frac{1}{2}$ way (see below) onto valve body and hose guide
3. Screw the black plastic extension tubes fully into the brass extension rings making certain that they are $\frac{1}{2}$ way (see below) into the extension ring and firmly seated against the valve body and hose guide.
4. If the extension rings extend below the counter top, place the plastic spacers over the valve body and hose guide.
5. Screw the flanged nuts onto the valve body and guide the tube to secure faucet to counter top.
